

Reviewer Acknowledgment 2022

The tripledemic of the flu, respiratory syncytial virus, and COVID-19 are challenging our health care system and all of us. In spite of these challenges, you, our reviewers, continue to support our authors and editors. One author emailed the editor, “the reviewer’s and their comments were gold standard in my view, respectful to the work whilst also challenging it to be better,” thus capturing the essence of the reviews that all of you submit. We would not have this quality journal without you.

We sincerely thank the people who submitted reviews in 2022, whose names are listed below, and sincerely apologize to anyone whose name was mistakenly omitted.
